UASLP - PMPCA

The academic personnel of PMPCA consist of 44 professors. Furthermore, there are other professors of the different faculties and research institutes at UASLP. The PMPCA maintains the yearly enrollment of MSc and PhD students.

The professors are divided into the five research areas or specializations from PMPCA:

- Prevention and Control
- Environmental Assessment
- Renewable Natural Resources
- Environmental Management
- Integrated Environmental Health

Further information about the professors and the research topics can be obtained at www.ambiental.uaslp.mx/pmpca/areas/
